- Mousse in 100 g tray
- Mousse in 85 g pouch

“SUPERFOOD”: MUCH MORE THAN A FAD, A TRUE ALLY FOR WELLBEING

Today, *superfoods* – known to be true concentrates of beneficial nutrients and active ingredients – are becoming increasingly popular for human consumption. Their popularity promotes the *sell-out* of products bearing these natural ingredients* on the packaging.

An unmissable opportunity to:

- Ride a strong and growing trend in the pet food world
- Diversify the super-premium offering to drive innovation
- Arouse interest in discerning and evolved consumers who are increasingly attentive to the welfare of their pets

SUPER

SPECIFIC NUTRITIONAL PROPERTIES

BLACKBERRY

Forrest fruit containing polyphenols, substances with **antioxidant properties** that promote the maintenance of **cognitive activity**.

POMEGRANATE

Cultivated and consumed since antiquity, pomegranate possesses numerous virtues. Its high polyphenol content holds **antioxidant properties** and is rich in **Vitamin C**.

ALOE VERA

A succulent plant prized for its many properties. The gel extracted from its leaves **supports normal digestion**.

ROSEHIP

Dog-rose berries are rich in **Vitamin C**, which supports the **body's natural defences**.

TURMERIC

Extracted from the root of an Asian plant, it contains curcumin, a substance with **antioxidant properties** capable of supporting **joint function**.

GOJI BERRIES

Goji berries contain polyphenols with **antioxidant action** and are rich in Vitamin C that helps support the **immune system**.

GREEN TEA

Green tea leaves are rich in polyphenols with **antioxidant properties** that help maintain **oral hygiene**.

ROSEMARY

A plant with multiple properties: **detoxifying**, **protects the liver** and **supports digestion**. It boosts the body's natural defences, thanks to its antibacterial and anti-inflammatory action.

PINEAPPLE

A source of fibre, useful for supporting **intestinal function**. It contains **B vitamins** that promote **energy metabolism**.

FOOD

FOR EVERYDAY WELLBEING

PUMPKIN SEEDS

Source of essential fatty acids, such as **Omega 6** and **Omega 3**, important for maintaining a **shiny coat** and **healthy skin**.

BLACK CABBAGE

A vegetable with many virtues. In particular, it is rich in **Vitamin C**, that supports the **natural defences** of the body.

SPIRULINA

Seaweed with **restorative properties**, **antioxidants** and support of the immune system. Its action even involves the digestive system, as it helps stimulate and balance the **intestinal microflora**.

DEVIL'S CLAW

Also known as devil's claw, this perennial plant from South Africa helps maintain **joint function**.

CRANBERRY

A red berry with multiple properties, including support for the **proper functioning of the urinary system** and the presence of flavonoids, known for their **antioxidant power**.

MILK THISTLE

Milk thistle, in particular its seeds, is a source of silybin, useful for supporting **liver function**.

YUCCA

A plant native to desert areas. Its extract helps to **reduce faecal odour** by decreasing the concentration of faecal ammonium.

APPLE

Apple is rich in **minerals** such as **potassium** and polyphenols with **antioxidant properties**.

Natural ingredients rich in valuable nutrients to promote energy, vitality and natural defences in cats and dogs.

MORANDO
SUPER *Pet* FOOD

animal proteins

HIGH PERCENTAGE OF ANIMAL PROTEIN

SuperPetFood formulas contain an **elevated percentage of animal protein** from meats of beef, pork, chicken, duck, tuna, turkey, salmon.

These selected meats, of **high biological value**, provide **essential amino acids, vitamins, calcium, phosphorus, iron** and other nutrients indispensable for metabolic processes.

ANTIOXIDANT

The combination of our superfoods helps **fight free radicals**, which are responsible for oxidative stress that has an impact on the immune system, ageing and general wellbeing.

DRY

CUSTOM KIBBLE: A GUIDE TO THE IDEAL CHOICE

INSECT FORMULA

DOG	KIBBLE · S HEART SHAPED	KIBBLE · M ROUND	KIBBLE · M HEART SHAPED	CAT	KIBBLE · XS ROUND	KIBBLE · S HEART SHAPED
	Dimension ≈ 8 mm	Dimension ≈ 12 mm	Dimension ≈ 14 mm		Dimension ≈ 7 mm	Dimension ≈ 8 mm

Kibble size is a key factor in ensuring proper chewing, promoting **digestion** and the **oral health** of our four-legged friends. Kibble that is too small risks being swallowed whole and too quickly, reducing the mechanical stimulation time on the teeth and gums. Kibble that is too large can be difficult to chew, especially for puppies, kittens and small dogs.

RICH IN STEAMED MEAT

The wet food products, prepared with **selected steamed meats**, preserve nutrients, taste and texture, whilst being **highly digestible**.

Thanks to this, the result is:

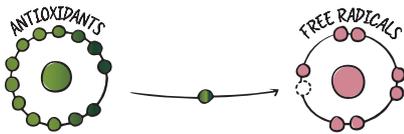

- **good palatability;**
- **a nice texture and softness;**
- **perfect nutritional intake.**

Rich in steamed meat

COMPLEX

Thanks to their **antioxidant content**, superfoods reduce the accumulation of free radicals and the damage they cause.

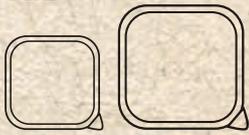

WET

THE RIGHT TEXTURE FOR EVERY WET FOOD SIZE

The **Morando SuperPetFood** line offers two different types of wet food textures to give your four-legged friend the texture they love best: **pâté** and **mousse**.

PÂTÉ

MOUSSE

MORANDO

SUPER^{Pet}FOOD

A complete line, available both as **kibble** and **pâté** designed to accompany your dog at every stage of life, with specific recipes for all needs.

INSECT FORMULA

In the new **Morando SuperPetFood INSECT FORMULA** recipes, the nutritional quality and palatability of insect proteins are combined with two other protein sources with high biological value: **duck** and **fish**.

The **Morando SuperPetFood INSECT FORMULA** recipes guarantee Extra Sensitive nutrition, specifically for dogs with delicate intestines.

Thanks to the use of *Hermetia illucens* larvae meal, these formulas combine the benefits deriving from proper nutrition with scientific innovation and care for the environment. Insect meal is an alternative type of protein in complete and complementary foods for cats and dogs. Being **highly digestible**, it is able to reduce possible undesirable reactions in sensitive pets caused by intolerances to animal proteins more commonly found in their diet.

To further protect extra-sensitive guts, these two new formulas are both **gluten-free** and provide different carbohydrate sources to satisfy individual taste preferences.

Hermetia flour is produced by the larvae of the soldier fly Hermetia illucens. The larvae are reared on approved feed for farm animals, such as wheat bran, rye (ground wheat), maize and water. The production facility is registered with the feed authority and approved by the veterinary authority. This ingredient has a high protein content, a balanced amino acid profile and excellent digestibility.
